

## SafeFlash™ Grenade Simulator

Stratom's SafeFlash is a multi-function grenade and explosive penalty simulation device designed specifically for military, law enforcement, and security professionals. This water-resistant, battery powered device provides an all-inclusive way to simulate standard, short delay, instantaneous, and impact grenade explosions with visual and auditory feedback.

- Four high intensity LED indicators and 110 dB siren provide a non-kinetic grenade simulation.
- Effective use for both indoor and outdoor trainings during the day or night.
- Construction and design allow unit to be reused in multiple trainings without the need to replace cartridges.
- Can be used as a remote explosive penalty device through use of an external wiring access configuration.
- Once SafeFlash is in use, reminder feature provides an audible and visual indicator every 5 minutes until the unit is found and turned off.

# SAFE FLASH™

## Product Specifications:

General	
Interface Buttons	Trigger, Power, Setting Toggle, REM
Visual Feedback	4 x 0.6" (10 x 1.5 cm) W LED Strips
Audio Feedback	110 db Siren at 4" (10 cm)
